EXPERIENCE

October 2021 – Now

Full Stack Web Developer • Trend-IT • Córdoba

Here, I have been able to develop myself using tools such as React for front-end development, JavaScript, Python, and Selenium for carrying out back-end tasks.

At the same time, I actively participate in project management, as well as coordinate and manage the team of developers and UX/UI, using agile methodologies such as SCRUM with tools such as JIRA, and GitHub for code correction and versioning.

EDUCATION

Informatic Engineering

Blas Pascal University, Córdoba

I started my studies in 2017 and have successfully completed 98.18% of the program. I have one final exam pending, which is expected to be taken in May of this year.

ADDITIONAL FORMATION

- Foreign language - English:
 1. FCE (First Certificate of English), B1. 2016
 2. Trinity College London, Grade 4. 2015

Over the years, I have also gained greater fluency in speaking, as well as become accustomed to reading in the same language due to my work environment.

STACK

FRONT-END:

Bootstrap – CSS – HTML – JavaScript – React – Redux – ReactRouter

BACK-END:

C++ - JavaScript – MySQL – Python – SQL Server

OTHERS:

Docker – GitHub - Jira
